

# MALCOLM SARGENT PRIMARY SCHOOL

Love To Learn

8 February 2019

Dear Parents

## **NATIONAL SCIENCE WEEK**

National Science Week this year is the week commencing 11 March and is always an exciting and inspiring week of discovery and investigation. During Science Week, in order to engage and inspire the pupils, we would like to celebrate the wide variety of careers into which STEM (Science, Technology, Engineering and Maths) subjects may lead. Each class will be looking for at least one parent volunteer who can visit their child's class to talk about their job role. This could involve a short presentation explaining what you do; pictures, objects and activities to go alongside this are very welcome! Please speak to your child's class teacher if you can offer some time during Science Week.

During Science Week, we will also be running a Science Fair in classes on Friday 15 March. This is an opportunity for children to bring in an experiment from home to share with the rest of their class. It is an optional activity, but those children who do take part will need to provide all resources for their experiment and complete the activity at home, before sharing what they did with their class on Friday afternoon. This activity can be related to any Science area or topic and we hope each class will have a wide variety of experiments to share!

Y3 children will hold their Science Fair on 14 March as they have their Stone Age dress-up day on 15 March.

We are all looking forward to learning more about STEM subjects during our exciting Science Week.

Yours sincerely

Laura Evans  
Science Leader
